muhtasimmahir@live.com

Dhaka, Bangladesh

To whom it may concern,

As a recent graduate with a Bachelor's degree in Computer Science and Software Engineering, I am eager to bring my passion for software development and my skills.

I have developed a strong foundation in a variety of programming languages, including JavaScript, Java, and C++. I also have excellent grasp over HTML5 & CSS3. During my studies, I worked on several projects that honed my skills in building end-to-end web applications, and I am confident in my ability to write clean and efficient code.

I am also well-versed in modern web development frameworks and libraries, including REACT, Express.JS, Node.js, and Spring Boot. I have experience in working with databases such as MongoDB, MySQL, and PostgreSQL, and I am comfortable with developing RESTful APIs to connect the front-end to the back-end.

In addition to my technical skills, I am a quick learner and a team player. I have a strong work ethic and a willingness to continuously improve, which I believe would make me a valuable addition to your team.

I believe that my passion for technology and my drive to succeed makes me a strong candidate for this position.

Thank you for considering my application. I look forward to the opportunity to further discuss my qualifications and how I can contribute.
